Eligible Applicants and Projects:
(Check an appropriate box)

- ☐ SOURCE REDUCTION: Applicant is a business that practices, or proposes to practice, appropriate source reduction by performing specific actions that cause a material net reduction in the generation of solid waste in the production of a product.
- ☐ REUSE: Applicant is a business that reuses a product (not a material) which has served its useful life, and provides new value to the product, by reconditioning, reprocessing, or some other value-added process which makes the product usable again for its original intended purpose. In all cases, the project must demonstrate that it will have a reduction in the amount of material being disposed of in California's landfills.
- ☐ RECYCLES: Applicant is a business that recycles by using post-consumer or secondary materials to produce a value-added finished product or provides necessary intermediate processing of a recycled/recovered material. A value-added product is one in which a material has changed its character or composition through a manufacturing process. This differs from collecting, sorting, and baling of recycled/recovered material for convenience or ease of transportation.

In all cases, the Borrower agrees to annually submit documentation, upon request of CIWMB, to verify annual diversion of solid non-hazardous waste from California's landfills and that it produces a value-added product.
